

# Q'S GADGET LAB: MAKER PROJECT

## BLOW GUN

### YOUR MISSION:

Protect yourself from enemy agents and/or hide underwater.

### WHAT YOU NEED:

- 18 inch PVC pipe (about ¼ diameter)
- Q-Tips (poison darts)
- Metallic markers (optional)
- Feathers (for darts)
- Black foam (for dart pouch)
- tape

### HOW TO MAKE IT:

- Make sure the interior of your PVC pipe is clear by blowing it and/or placing a Q-tip in the end and blowing with one quick hard breath.
- Decorate your pipe with Japanese letters, symbols, or anyway you wish.
- Cut the black foam into a 4inch x 8 inch square. Fold in half and staple the sides to leave a top opening. This will be your dart pouch (to hold the Q-Tips)
- Tape or hot glue one or two feathers on one side of the Q-Tip.

### HOW TO USE IT:

- Place a dart (Q-Tip\_ in the end of the pipe).
- Pick a target or make a target on the wall (non-living)
- Blow hard and quick to make your dart fly through the air toward your target.
- Practice for accuracy and distance.
